

EXPERIENCE

AWAQ (Spain / Colombia) - www.somosawaq.org

Jan 2023 / Present

Devops Trainee

- Collaboration with NGOs by learning about the integration of Salesforce CRM with the platform and developing applications within it, to achieve process automation and different events.

DIGITALIA (Peru) - REDLO Project (www.redlo.com.pe)

Dec 2022 / Present

Front-End Developer

- I used React to process and display data from a Django server. Handle of filtered data to ensure that it was presented according to the project goals and visual design created in Figma.
- Implemented fundamental concepts of React such as components, props, state, lifecycle, and hooks.
- Handled HTTP methods for communication between the client and server.
- Experience using React Router DOM.
- Used the SCRUM methodology for planning objectives with the team.
- Stack: HTML, CSS, JavaScript Bootstrap, React.

Freelance / Own projects

Northern Lights - www.northern-lights-seven.vercel.app/

Feb 2023 / Present

- Modern presentational SPA and future e-commerce website built in React, utilizing react-bootstrap for styling.
- Reactive forms, image gallery, contact form, and inter-component communication
- Stack: HTML, CSS, JavaScript, Bootstrap, React.

Tarquini Inventory - www.tarquini-inventario.vercel.app

- Full stack app made in Angular with TypeScript to organize the company's inventory in a more visual and dynamic way; it allows assigning the stock of items to users and/or sectors and classifying them by type.
- Server built with Node.js and Express, using Sequelize as the ORM to interact with a PostgreSQL database.
- Stack: TypeScript, Angular, CSS, NodeJS, Express, Sequelize, PostgreSQL

More projects on portfolio: <https://castioni.vercel.app/projects>

Projects in Bootcamp

@ SoyHenry JavaScript Full Stack Web Developer Bootcamp (+800hs)

Rent-Ten - <https://rent-ten.vercel.app/home>

Aug 2022 / Dec 2022

- Application dedicated to temporary rental of accommodations worldwide.
- Includes user authentication through Auth0, geolocation, MercadoPago payment gateway, superadmin, darkmode, localStorage, email notifications, Angular router guards for access control.
- Developed with a team of 6 people using Scrum methodologies and GitHub for version control
- Stack: Angular, TypeScript, Bootstrap, Angular Material, NodeJS, Express, Sequelize, PostgreSQL

WorldCountries - www.worldcountries-app.vercel.app/

- Simple SPA proposal to showcase skills using React as the main library, handling local states, global states using Redux, communication between components, pagination, react-router-dom, and using pure CSS for styling.
- Server made in NodeJS with Express, and sequelize as the ORM to interact with a PostgreSQL database.
- Stack: JavaScript, React, Redux, CSS, NodeJS, Express, Sequelize, PostgreSQL
